

A Report to the Community

**The Work of the Reproductive Health Advisory Team
Lakeview School District: July, 2014 – June, 2016**

The following is a summary of the progress of reproductive health advisory meetings held from 2014-2016.

Reproductive Health Advisory meetings held: February 9, 2015, March 9, 2015, April 15, 2015, May 26, 2015, November 10, 2015, March 31, 2016, May 17, 2016

Accomplishments:

- Successfully recruited and increased parent representation. Currently have representation from each school in the district.
- Created a SHIFT (Sexual Health Initiative for Transformation) District Leadership Team comprised of principals, counselors, health education staff from the middle and high school, district parent, district student services director, high school students, CISD Regional Health Consultant, and assistant superintendent.
- Worked with Calhoun County Health Department to successfully open a health center in the middle school.
- Developed policies and procedures for high school students to access the health center services during the school day. Have also worked with high school media teacher to create promotional / informational videos shown during Channel 101 News.
- Worked with district health teachers and administrative staff to expand health and reproductive health 5-12.
 - Implemented health classes (Life Skills) at the Middle School at each grade level.
 - Created a new combination health and post-secondary planning class at the High School for all 11th grade students (Career Prep and healthy Living).
 - Worked with the advisory team to review and approve curriculum and resource updates in all secondary health classes.
 - Expanded 8th, 9th, and 11th grade curriculum to address LGBTQ.
- Multiple staff have participated in the Silent Crisis training, focusing on trauma experienced by LGBTQ students.
- Reviewed 2015-16 MiPhy data and compared to 2011-12 and 2013-14 student data. Will be used to make adjustments in the initiatives for 2016-17.
- Spectrum student group at the middle school was created. Provides safe venue for LGBTQ students.
- Started process to regularly identify and schedule time to meet and listen to the concerns and challenges of students from different groups (HS GSA, MS Spectrum).

Next Steps:

- Work with advisory team task force to develop a comprehensive Health/Reproductive Health Handbook.
- Continue working to bring new members on board representing the different community roles.
- Continue exploring how to increase and align health instruction K-4.

- Expand opportunities to engage more students / student groups in conversations around their needs.
